## Full Stack Developer

---

I am an entry-level Full Stack Engineer, currently self employed working on a variety of development and maintenance projects. I am looking for a job in the computer software industry. I am recent graduate of the bootcamp-style programming academy Coding Dojo. I am able to develop full stack applications using JavaScript, MySQL, Java, Spring Tool Suite, Django, Flask, MogoDB, Express, Angular, Node, NoSQL, HTML/5, and CSS/3, jQuery. I am interested in a position working anywhere in the stack, and I particularly like working with the front end. I fell in love with Angular and really enjoy learning new languages and deepening my knowledge of code.

## Technical Skills

---

- **Programming:** Java, MEAN, Python, Javascript, HTML, CSS, jQuery and currently learning Flutter & Dart
- **Software Management:** GitHub
- **General applications:** Google (Drive, Docs, Gmail, Calendar), Microsoft Office, Photoshop CS, Illustrator CC
- **Operating systems:** Mac, Windows 10, Ubuntu Linux

## Professional Experience

---

### Self Employed - Full-stack Developer

Jan. 2018 - Present  
Seattle, WA

- Maintaining, updating and developing Wordpress and Wix sites.
- Currently building and designing a mobile application to secure a patent for a start up.
- Collaboration with another developer to create a communal household chore organizing application.

### Nice Moves Moving - Crew Chief

Oct. 2008 - Dec. 2017  
Seattle, WA

- Organizing, planning and coordinating small crews of movers to relocate goods on small and large scale moves.
- Cash management, client interaction and crew management.
- I was responsible for inventory, conflict resolution and safe and timely execution of moving service.

### **Critical Northwest - *Producer***

Feb. 2014 -Sept. 2014  
Seattle, WA

- Responsible for organizing and managing 22 teams of volunteers to create infrastructure for a large scale art and music event.
- Duties included: Theme creation, management and creation of 63k budget, leadership, participating in board meetings, organizing teams, management of time lines, running (production) meetings, pre-event coordinating, on-site directing, clean up and breakdown of event, and executing efficient use of time and resources.

### **The WhereHouse - *Producer / Consultant / Curator***

Sept. 2006 -Sept. 2013  
Seattle, WA

- Created a private event venue from the ground up. Designed and built stage, bar, and atmosphere.
- Monthly events were held for everything from arts forums to circus performances. The goal was to provide a place where artists, musicians, vendors, chefs, and performance artists could market their talents in an interactive setting.
- Acted as creative consultant and curator for local promoters and event producers for space rental.

### **Current Projects**

---

- **Choreganizer:** Responsible for idea and concept. Primary front-end developer, designer and moderate backend engineering.
- **Lit Mats:** Working as developer on application for local startup.
- **ETI Group:** Responsible for website updating, maintenance and support.
- **Starborne Sound:** In charge of design, updates and maintenance for WiX site.

### **Education and Training**

---

#### **Coding Dojo - *Certificate***

Jan. 2018 -Jul. 2018  
Seattle, WA

- Completed course material in Python, MEAN, Java

#### **Other**

Present  
Seattle, WA

- **Swift:** Taking the online Swift course at Udemy
- **Flutter/Dart:** Self teaching the Flutter/Dart stack
